DEPARTMENT OF GEOGRAPHY

AIMS OF PROGRAMME:

The aims of the syllabus describe the B.A. / B.Sc in Geography. These aims outline the educational context in which syllabus content should be viewed. Many of these aims may be delivered by the use of suitable case-studies, through application of geographical skills and through practical field visits.

The BA. / B.Sc Geography syllabus aims to enable students to:

1. Know the significance of scale in studying geography.
2. Know the processes functioning at various scales within physical and human environments.
3. Improve a sense of space, place and location.
4. Develop consciousness of the relevance of geography to understanding and solving contemporary environmental problems.
5. Realization of the main fundamentals of physical geography and human geography and its interconnectedness between them.
6. Explain the causes and effects of change over space and time on physical and human environments.
7. Develop an insight into the nature, value, limitations and importance of different approaches to analyze and explanation in geography.
8. Increase the knowledge and ability to use and apply appropriate skills and techniques including fieldwork.
9. Improve a logical approach in order to present a structured, coherent and evidence-based argument.
10. Develop a skill concern to accuracy and objectivity in extracting, recording, processing, presenting, analyzing and interpreting geographical data.

DEPARTMENT OF GEOGRAPHY

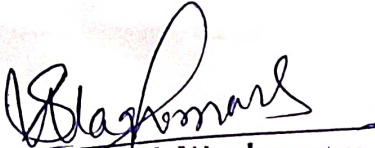

PROGRAMME OUTCOME

Program Outcome Geography		<p>After completing of Paper wise outcome in Geography, students will be able to;</p> <p>I. Knowledge outcomes:</p> <ul style="list-style-type: none">• Demonstrate knowledge of physical and cultural features of the earth.• Locate them on a map.• Know about the basic disciplines of Geography and its sub branches.• Know the basic concepts and terminologies used in Geography like; interior of the earth, plate tectonic, sea floor spreading, population growth, disasters, composition and structure of atmosphere, hydrosphere, etc. Differentiate between minerals and rocks, weather and climate, interior of the earth, basic industries, farming etc. Get information about the causes and effects of local, national and International problems like global warming, acid rain, ozone depletion, soil degradation, deforestation etc. <p>II Skill outcomes:</p> <ul style="list-style-type: none">• Carry out surveying and learn the art of map making and prepare maps for the areas with the help of surveying techniques.• Gain knowledge of quantitative methods and their ability to use statistical Cartographical methods to solve geographical problems. Construct various types of projections and scales as per requirement of the Study.• Collect primary and secondary data in the field. Apply various statistical formulas to analyze data Use cartographic techniques with the help of simple software techniques like; MS Excel. Handle topographical and weather maps and interpret them. Identify types of rocks.• Know about Geographical Information System (GIS) and Remote Sensing (RS).
---------------------------	--	---

1	Part A Geography (Physical Geomorphology)	To define the Geomorphology and to explain the fundamental concepts of it.
		To understand the geotectonic hypothesis for by different scholars about the plate tectonics.
		To explain the earth movements, geosynclines and forces of crustal instability.
		To understand the concept of gradation, mass movement and slope replacement model.
		To explain the Geomorphic processes erosion and depositional landforms.
2	Part B Physical Geography	To define the Climatology, composition and structure of the atmosphere, isolation and heat balance.
		To understand the vertical and horizontal distribution of atmospheric pressure, Monsoons and its mechanism.
		To explain the humidity and its types, hydrological cycle, types of clouds and rainfall.
		To understand the classification, air masses and fronts, cyclones and thunderstorms.
		To explain the classification of climates with different scholars view point and global climate changes.
3	Regional Geography of Karnataka	To discuss the physical features of Karnataka, particularly the soil, drainage, vegetables along with water resources of Karnataka
		To understand the forest and agricultural resources and their distributions.
		To understand the major mineral resources of Karnataka production and distribution.
		To understand the major mineral industries their distribution and production.
		To discuss the physical aspects, major irrigation projects and major crops in Karnataka.
4	Population Geography	To discuss the population geography and its development
		To understand the Malthusian and Karl Marx's theory of population
		To discuss the Migration
		To understand the determinants of population and the concept of optimum
		To the Population policies in developing and under developed countries
5	Regional Geography of	To discuss the physical features of India, particularly the soil, drainage, vegetables along with water resources of India.

India	<p>To understand the forest and agricultural resources and their distributions.</p> <p>To understand the major mineral resources of India production and distribution.</p> <p>To understand the major mineral industries their distribution and production.</p> <p>To discuss the physical aspects, major irrigation projects and major crops in Karnataka.</p>	
6	Settlement Geography	To discuss the human settlements, evolution, size and growth, distribution and spatiotemporal trends of settlements.
		<p>To understand the spatial distribution and pattern of settlements with theoretical models and empirical findings.</p> <p>To discuss the morphological structure of settlements and landuse theories, functions of towns along with the difference between rural & urban.</p> <p>To apply the Christaller and Losch theories for determine the hierarchy of the settlements.</p> <p>To discuss the issues and policies on population& settlements as well as environment.</p>
7	Human Geography	<p>What distinguishes human geography from other social sciences is the study of social processes in terms of space and place.</p> <p>At the Master Programme in Human Geography you learn to understand the spatial connections and complexities of the social world, developing the analytical capabilities to examine the relationship between local processes and conditions and those at the national and global scale.</p>
8	Environmental Geography	<p>To discuss the significance of environmental geography and changing relationship between man& environment</p> <p>To understand the major biomes, economic importance of forest and National Forest Policy in India</p> <p>To discuss the Migration, Factors, Causes and Types, Internal and International migration.</p> <p>To understand the determinants of population and the concept of optimum, over and under population</p> <p>To understand the population policies in developing and under developed countries, Population Policy in India.</p>

Program Outcomes (POs)	
By the end of the program the students will be able to:	
Geographical Knowledge	Give an explanation of relevant terms and concept of geography including definitions.
Project Management	Recognize geographical principles, theories and models to manage projects and achieve its objectives.
Problem Analysis	Find solution to environmental and Human problems
Modern Tool	Application of modern tools and techniques to interpret how processes bring changes in systems, distributions and environments.
Research of Complex Problems	Apply research-based knowledge to provide valid conclusions and demonstrate skill of analysis and synthesis of geographical information.
Communication	Communicate effectively by identifying human activities and use Geographical data to identify trends and patterns.
Design/development of solutions	Carry out investigation into the complex and interactive nature of physical and human environments.
Geography and Society	To inspect the environmental and societal issues and compare between the places, environments and people.
Multi-disciplinary Settings	Assemble geographical evidence, ideas and arguments with multi- disciplinary setting.
Ethics	Develop ethical principles and commit to professional ethics and responsibilities and norms of scientific practices.
Life-long Learning	Understand the effects of geographical processes and change on physical and human environments and life-long learning of geographical studies.
Environment and Sustainability	Assess how the viewpoints of different groups of people, potential conflicts of interest and other factors interact in the management of physical and human environments to bring environmental sustainability.

DEPARTMENT OF SOCIOLOGY

PROGRAMME OUTCOMES AND COURSE OUTCOMES

AY : 2022-23

PROGRAMME OUTCOME OF SOCIOLOGY

PO: 1 Students can pursue teaching career in primary, High school, PUC, UG and PG

PO: 2 Students can pursue career as Public Relationship Officer

PO: 3 Students can become Grade an officer in Women and Child Welfare Dept.

PO: 4 Students can pursue career as community development and Rehabilitation Center Officer

PO: 5 Students are able deliver better service to rural community as PDO

PO: 6 Students can serve better services such as Heath, Media Consultant and rehabilitation counseling officer.

COURSE OUTCOMES

B.A I Semester

INTRODUCTION TO SOCIOLOGY

- CO: 1 Students going get the idea how the sociology subject originates and develops over the years
- CO: 2 Able to understand the meaning and its relationship with other subjects like criminology, anthropology etc.,
- CO: 3 Students come know the relevance of subjects in their personal as well as professional life.
- CO: 4 Able to understand the basic sociological concepts like. Society, Community, Association, Institutions, socialization, social stratification social mobility, social interactions etc.,
- CO: 5 Able to get the basics of Social Science Research Like., Meaning, Objectives, Techniques and Methods Like., Historical, Comparative, Statistics and Case Study
- CO: 6 Students will inculcate research report writing skill
