DEPARTMENT OF COMMERCE

INNOVATIVE TEACHING PRACTICES

2025-26

HOD

IQAC COORDINATOR

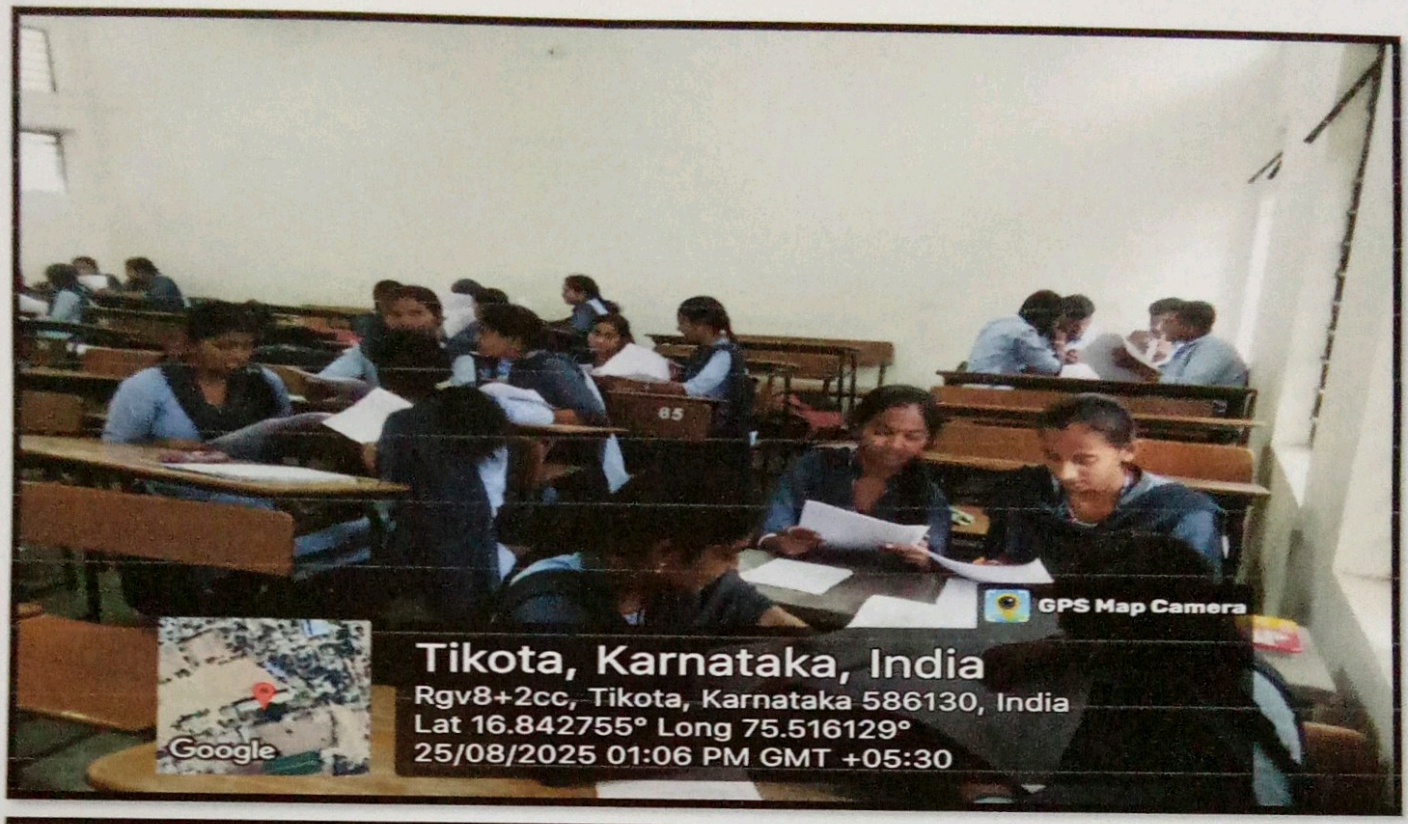

PRINCIPAL

The Dept. of Commerce has been extensively using the innovative teaching practices such as-

- Group Discussion
- Classroom Seminars
- Role-Playing
- Case-Study
- Problem Solving
- Field Visits and
- Use Of ICT
- These pedagogical methods expose the students to experiential learning through which their skills will be enhanced and make them future-ready. These practices enhance the conceptual clarity and make the students able to handle real-life situations efficiently. Group Discussions and Classroom seminars are conducted regularly. Under Role-Playing, a mock bank office will be created and students will be trained and instructed to play roles of various officers of a bank branch. Further, some of the real-life problems of commerce and business will be given to students to find solutions.
